

Why REACH Tonnage Coverage Certificate Is Important?

Firstly, there are many practical questions associated with documenting compliance at the point of entry of goods into the Customs territory of the European Union (EU), particularly with respect to valid pre-registrations, whether the substances are exempt or not from registration, whether the pre-registration obligation was taken over by the importer, the only representative of the exporter, or the only representative of the exporter's supplier and whether the quantities imported have exceeded the tonnage band registered. A certificate of compliance issued by OR will solve those issues.

Secondly, ECHA Guidance on Registration 1.5.3.4 clearly states "In cases where an importer is also importing quantities of the same substance directly, then both the only representative and the importer must be able to clearly document to enforcement authorities which imports are covered by the registration of the only representative (OR); and which are covered by the importer; otherwise, the importer remains responsible for all his imports."

Thirdly, CEFIC guidance document also states that an Only Representative (OR) must have an available and up-to-date record of those importers that are covered by his registration and therefore become Downstream Users (DU). In addition, all the importers covered by an OR must be aware that such OR exists and that he covers his substance and volume in his registration.

Further Help

If you need further help, verify the validity of any document or apply for new REACH tonnage coverage certificate for your new exports/imports or previous exports/imports, please contact:

Ms Alice Qian, Supply Chain Communications Officer
